

LACROSSE STOOL

From initial design inspiration the style behind the LaCrosse was carefully examined, evolved and refined during the research and development stages. Elegant yet simple, multifunctional and with a compact size, the stool provides the perfect accessory to many different furniture designs and a diverse range of interior styles. It's probably due to this reason that our interior design clients have responded so well to its introduction. They recognise the playful adaptability of the style the dependable Southland beech and superior foam construction. That it can be finished in a range of fabrics enhances this desirability. It's not just these clients that have recognised the strengths of the LaCrosse however, and the stool enjoys universal appeal. With colour, verve and practicality this piece enhances any room in which it finds a home.
