

## BRUNA SHELVING

Whether dividing a space or defining it, the Bruna shelving unit provides a playful vertical canvas for layering and experimentation. With off-beat layers and abstract geometry, the shelving adds interest to an interior without dominating it. Freestanding on a steel base, it can sit pretty as a wall piece or confidently divide and define the room, its fine lines and liberal spacing allowing light and movement to flow freely.

Bruna's powder-coated steel can be striking in black or classic grey or with precise hue to enhance an existing colour palette. The floating shelves can be crafted in steel or timber and the mounted castors ensures shelving is quickly and easily repositioned.
