MASON TABLES

Providing natural texture to a setting without bulk, the smooth stone surface and slender steel frame assures strength while maintaining a sleek profile. The engineered quartz surface is an accessible alternative to granite or marble. It's hand-worked to create a smooth polish and retains the cool, tactile qualities of natural stone, absorbing and reflecting light in different ways as the day changes. Available in a range of sizes, the Mason stands out while still allowing other pieces within the room to breathe.
